SecureTrust™ Merchant PCI Compliance and Security Solution

INCREASE YOUR REVENUES WITH MERCHANT SERVICES

Benefits

- Integrated security tools along with PCI compliance validation services expressly designed for small and medium-sized businesses

- Affordable, easy-to-administer security to help protect your merchants' businesses from cybercrime

- Simplified PCI compliance workflow for your merchants

- Real-time, aggregate merchant monitoring for a clear view of your program status

- Services expansion opportunities

- Adds recognizable value to your merchants to help you increase revenues and merchant retention rate

Equipping and motivating merchants to achieve Payment Card Industry (PCI) compliance securely and efficiently is an ongoing challenge for merchant program sponsors.

When you partner with SecureTrust to develop and administer your merchant program, you have a high-touch, dedicated team of experts helping you develop and nurture your program, an integrated set of security tools to help speed your merchants to PCI compliance, and automated, easy-to-use tools for real-time program monitoring.

Global leader in merchant programs

With the industry-leading SecureTrust Merchant PCI Compliance and Security solution, one of the key components in the SecureTrust Merchant Risk Management program, SecureTrust runs some of the largest Level 4 merchant programs in the world. Through our credit card processor, acquiring bank and independent sales organization (ISO) partners, we serve more than three million merchants in successful merchant programs ranging from small to large-scale international programs.

Your program benefits include:

- Relationship Manager to help you maximize your opportunities with the program.
- Dedicated Project Manager for your specific needs.
- Marketing Support to help you increase awareness about your services and their value.
- Global world-class 24/7/365 Compliance Support with outbound calling, autodial, and support in 12 languages.
- Security Engineer/Qualified Security Assessor with PCI compliance expertise.

Services Expansion To Help Increase Revenues

A key way to increase your service revenues is by providing your merchants with the security tools designed for small and medium-sized businesses (SMBs) that are integrated in to the TrustKeeper® PCI Manager workflow. Partners who offer the security tools in their program have been shown to more than double their annual merchant revenues. The tools are easy to install and do not require support from you or your team.

Security Designed for Small Merchants

There are more than 17 integrated merchant security tools offered to you in three bundle packages according to your goals.

SecureTrust economies of scale allow us to offer these high-value tools to you at prices that are easily within reach of your merchants. These capabilities could cost more than seven times more if purchased independently from other vendors, while some of the security services designed for small merchants cannot be found anywhere else. (See opposite page for the full list.)

Customize and Monitor Your Program

The configuration of your merchant program is flexible so it can be integrated with your go-to-market strategies. Customization options include risk-based outreach, portal co-branding and messaging, data feeds for onboarding and reporting, single-sign-on capabilities. Fast Track validation profiles allow you to customize the merchant workflow.

Sponsor aggregate reporting provides you with clear real-time merchant monitoring capabilities. And, standard reports for Visa and MasterCard requirements are a click away.

Program owners find they achieve maximum benefits when they employ the SecureTrust Web Risk Monitoring solution along with the Merchant PCI Compliance and Security solution to help secure the entire merchant lifecycle.

Deep PCI Compliance Expertise

Working with SecureTrust is like adding trusted compliance and security advisors to your staff. PCI Manager is continuously adapted to address and even anticipate evolving requirements from the PCI Security Standards Council and card brands.

Simplified Workflow to Speed Compliance

PCI Manager provides industry-leading PCI compliance validation services that help even the smallest merchants achieve and maintain compliance. It simplifies the process by presenting merchants a pathway that's customized to their business. The intelligent PCI Wizard walks them step-by-step through the process of certifying PCI Data Security Standard (DSS) compliance. The PCI Wizard uses the information the merchant has provided and matches it to the PCI DSS Self-Assessment Questionnaire (SAQ), even prefilling some of the questions for the merchant.

TrustKeeper PCI Manager Bundles Integrated Security in Three Tiers

The SecureTrust process puts security first, which helps to ensure cardholder data is protected, streamlines the merchant compliance process and helps you reduce the risk in your portfolio. You can scale the number of tools and features in your PCI Manager offering to meet your program and revenue goals.
